Training Outline

Basic Computing for Locksmiths

Use the computer to make your business run better! This class is aimed at the business owner and will provide hands on experience in using Microsoft Excel and Word. We will look at creating templates to assist in the day to day running of your business and develop simple to use databases to organise your digital records. This class will be a basic class and no prior computer skills necessary! Also a great chance to refresh your skills.

Class size: 15 people

2013 Cloner Review:

Back by popular demand, this class will compare and review each of the main Cloner options for Locksmiths in our part of the world. The categories these cloners will be tested on are: Ease of use, Chip information, Chip cloning (range covered), Future proofing, Extra features, Texas Crypto cloning, Philips Crypto cloning, Portability and Cost.

Class size: 30 people

Rotating Constants - Master Keying

Rotating constants is an essential tool in the Master Keyer's arsenal. They can be used to generate large systems and also to expand an existing system that has run out of room. This class will have you master keying like a pro in exactly one hour!

Class size: 12 people

Australian Building Code Information

Presented by a locksmith for locksmiths, this interesting & informative session is a must for all Locksmiths. In this new age of increasing litigation & council fines, it is more important than ever that Locksmiths not only increase their knowledge, but stay up to date. Many areas are covered including important changes 1st May, 2013.

Class size: 30 people

Troubleshooting Dialling errors

One of the most common scenarios the locksmith faces is the combination safe lock which doesn't open. This practical class will teach you some of the basics to making sure that the lock is working correctly and then give you the chance to identify and correct some of the more common faults you may come across.

Class size: 15 people
