

New Zealand's own restricted key profile

NZ SERIES

-  Bump, pick & drill resistant
-  Registered design protection
-  Multi-broach
-  Price competitive

New Zealand's own restricted key profile

NZ series is the very latest mechanical restricted keying system that has been developed specifically for the New Zealand market.

BUMP*
RESISTANT

DRILL*
RESISTANT

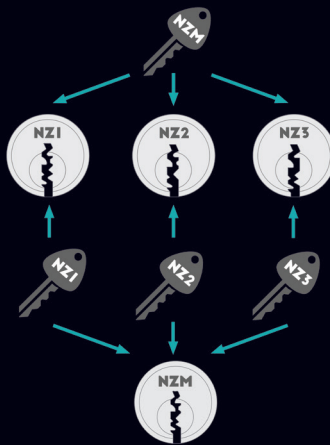

PICK*
RESISTANT

With bump, pick and drill resistant options, this flexible restricted key system can be implemented in any domestic or commercial setting.

The three optional layers of added security are sure to deter any would be thieves from breaking into your home or workplace.

Multi Broach System

The availability of three individual profiles with an overriding master profile allows for the building of very simple single profile master keying systems, right up to complex multi profile master keying systems.

Features & Benefits

Anti-bump pins

Provides protection from bumping

Mushroom top pin

Provides protection from picking

Hardened pins

Provides protection from drilling

MLA Trademarked keyhead

Provides industry protection against unauthorised key duplication

Cupronickel key blanks

Keys are very strong & hard wearing

Extensive barrel range

Allows NZ Series to be used in almost every type of lock

Multibroach key blanks & barrels

Allows complex master keying systems to be built

Coloured plastic inserts

Allows colours to be used to identify keys

Design registration until 2023

Provides legal protection against unauthorised key duplication

Master Locksmiths Approved

The NZ Series offers protection against unauthorised key duplication via design registration until October 2023, with additional protection provided by the MLA Code of Conduct. Your keying system can only be modified or extended by the MLA locksmith who built it; the issuing of additional or replacement keys requires an official order with an authorised signature.

Flexibility & Affordability

There is an extensive range of barrels available to suit almost every application, making retro-fitting your current security systems with the new NZ series easy.

Eight coloured inserts also allow for easy key identification and to manage door control.

Retro-fitting or installing the NZ Series restricted system is a cost-effective solution to ensure your home, office or workplace is secure.

Talk to your Master Locksmith Association member for further information on the NZ Series Restricted Key System or for security advice.
